Dear Library Board,

1. Razorsedge Software program is in the training process for the users so it can be launched in September.
2. Michael Watson and Meg Beene are working on a grant to obtain funds to start a digital library branch.
3. Hoping the library reopening will allow on line book sales to continue so we can get some revenue coming on. Working on going through all the books which are coming in and devising a new system to keep unneeded books out of the system.
4. We were able to budget for a new office manager and an on line sales intermediary and stay within budget.
5. Office manager interviews are scheduled for September 3.
6. We will begin membership drive once Razorsedge is launched. Having each of the committee member contribute 10 strong leads who we can reach out to for membership with the new levels we have developed.

Anne
